INSTITUTE OF ACCOUNTANCY ARUSHA

SHORT COURSE ANNOUNCEMENT ON BASICS OF BLOCKCHAIN TECHNOLOGY

(27th February – 01st March 2019 - IAA Arusha Campus, Arusha & 06th – 08th March 2019 – IAA Dar es Salaam)

1.0 COURSE BACKGROUND

In recent years the term block chain has been popular in the Technology world. Block chain is a digital ledger in which transactions are recorded chronologically and publicly. This technology is being said to bring some disruptive effects to careers and businesses. In terms of career it will result into absolute and new careers. According to researchers the technology has some advantages in almost every industry including banks, Agriculture, health industry, in keeping property records, in smart contracts, in the supply chain, music/media rights and in political voting. This has been so due to the vast amount of advantages experienced by its use. These advantages include accuracy, cost saving, decentralization of data, efficiency, privacy and security.

The world technological trend shows that in the near future almost every sector will have the opportunity to use block chain technology. In various forums in Tanzania such as the Annual ICT conference 2018 and the Accountants annual conference 2018, block chain was one of the hot discussions that brought so much attention to the audience. This course is designed to create awareness of the block chain technology and expose participants to different areas of its application.
